

NCSNA Marketplace Trial Pitch

A low-risk path: start with an eBay listing audit, then move into a 60-day management trial if the opportunity is clear.

Recommended path

Lead with a simple marketplace review first. If NCSNA wants help implementing and improving the account, roll the audit into a 60-day eBay management trial.

Step 1: Marketplace Listing Audit \$197 Standard Audit Best first move if they want proof before a monthly commitment. • Review priority eBay listings • Identify title, content, buyer-confidence, and cleanup issues • Give a simple list of what to fix first • Recommend whether the trial makes sense	Step 2: 60-Day eBay Trial \$200/mo + 15% above \$1,500 Best move if they already want help managing the eBay account. • Small base covers the work • Upside only applies above the baseline • 60 days keeps it low-risk • Enough time to improve listings/store execution
--	---

If they object to 15%

Fallback: **\$250/month + 10% of monthly eBay sales above \$1,500**. If they want the simplest structure, use **\$300/month flat for 60 days**. Do not go below 10% unless the base is at least \$300/month.

Simple message

“For NCSNA, I'd start with a small marketplace review before changing the whole account. We can look at the priority eBay listings, point out the fixes that matter most, and then decide whether the 60-day management trial makes sense. If you want us to move directly into helping manage the eBay account, I'd suggest a 60-day trial at \$200/month plus 15% of monthly eBay sales above \$1,500.”

Ask for eBay store link, 3–10 priority listing links, current monthly eBay sales baseline, and which products they most want to move.	After agreement Create NCSNA client folder, copy the audit template, capture baseline, review listings, deliver priority list, then offer one next step.
